

Why the laugh floor is losing efficiency

What is
going
wrong?

- Doors getting lost
- Slow response's with problems
- Inefficient handovers
- Inaccurate energy predictions

What
this is
causing!

- Security risk
- Increase risk for monsters
- A decrease in productivity
- Supply chain problems

The Aim

- A decrease in incidents – Issues spotted earlier
- More efficient operations- More automation
- Increase in laugh production- Better planning and more accessible data
- Controlled shift handovers- Shared dashboards and pipeline
- Reduce costs – move to the “cloud”
- **Fewer incidents** because issues are spotted early

The Fix

TAKING DATA OFF PREMISE TO MICROSOFT AZURE

INTRODUCE THE IOT HUB- THE “EYES AND EARS” OF THE FACTORY

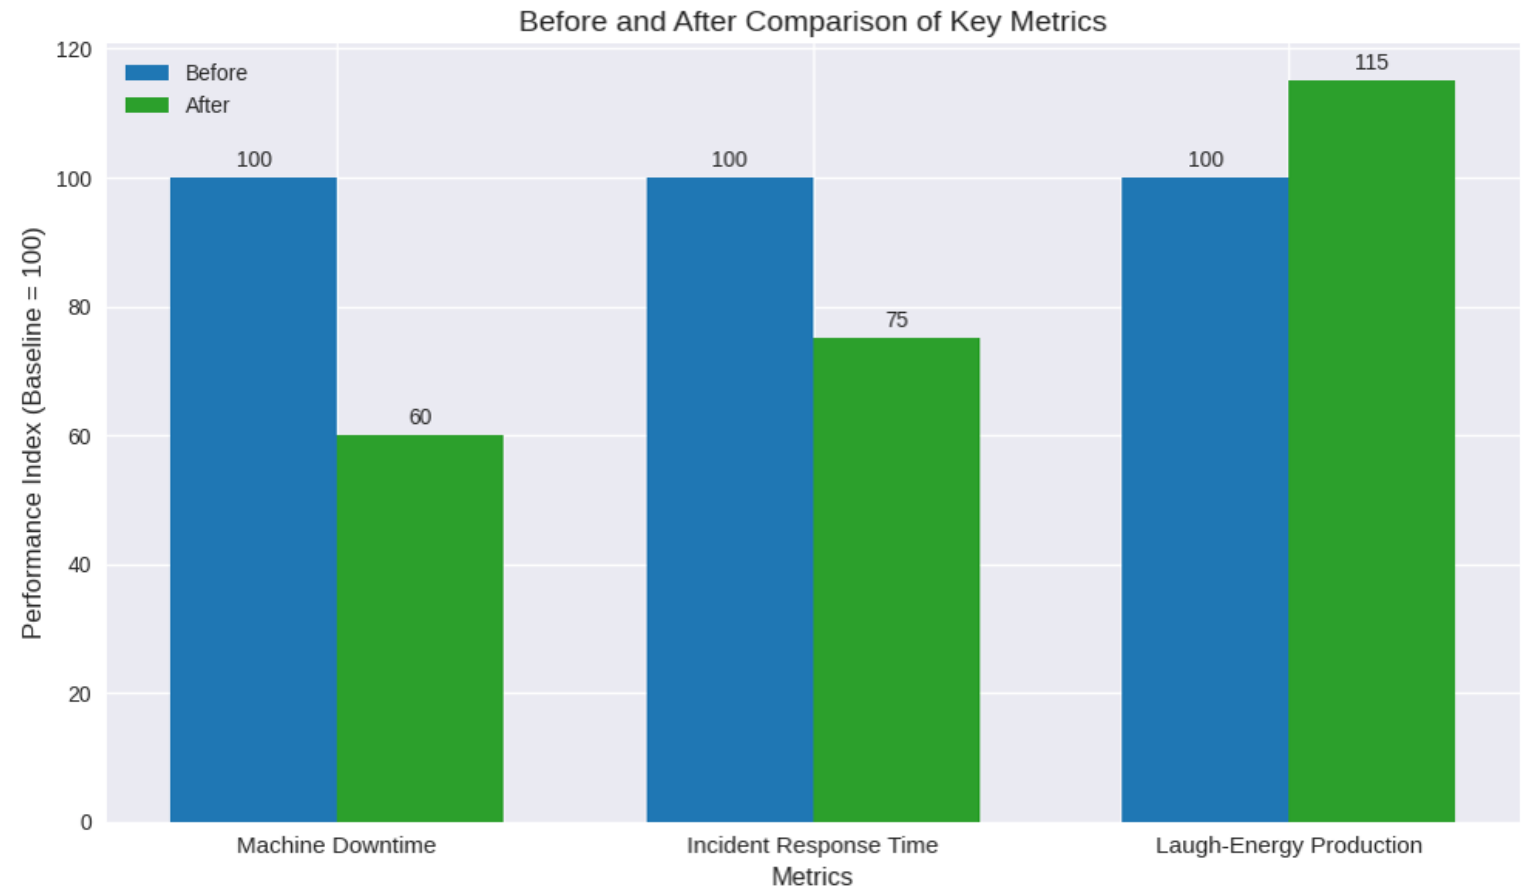

POWER BI- A CLEAR DASHBOARD FOR ALL

POWER AUTOMATE- THE ONLINE WORKER WHO NEVER FORGETS

TEAMS + CO-PILOT- COMMUNICATION MADE EASY

Overall

How the average day might pan out!

Next steps

1

Set up a meeting
demoing all of the
tools to get a better
understanding

2

Build a simple
dashboard to see
what it can be like

3

Transfer data to the
cloud

4

Make much more
laughs
